WHAT IS LOQAL.AI?

A simple tool built for clinics, doctors, and diagnostic centers. Patients find your clinic online, book appointments without calling, and read genuine reviews before they visit — while everything runs on its own in the background.

More patients find you

When someone searches for a doctor nearby on Google Search or Maps, your clinic shows up prominently — with verified address, OPD timings, and working numbers. You capture local patient intent the moment it appears.

Easy appointment booking

Patients book consultations straight from Google Maps or your clinic page, 24x7. Automatic reminders go out before every slot — fewer no-shows, less strain on your front desk.

Your reputation, on autopilot

After every visit, patients get a gentle nudge to leave a review. LoQal.ai replies kindly and professionally on your behalf — your Google rating grows organically, week after week.

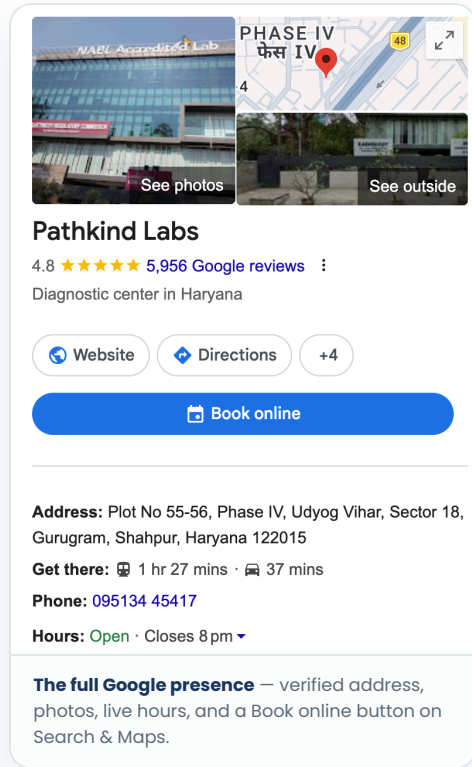

Never miss a patient message

Patient inquiries from WhatsApp, Google, and your website land in one dashboard. Common questions about fees, specialties, or timings get instant, accurate auto-replies.
